Fruiter

IDX617 Mobile Web / Xinying Ren

Statement of intent

Fruiter is a tracking app for different types of fruit trees.

When we have a favorite fruit but are curious about where the fruit tree will grow, Fruiter can help users locate the fruit tree. when we are curious about what geographic location and climate affect fruit growth. Fruiter can also provide useful information by tracking the location of fruit trees. At the same time, users can add different types of fruit trees for tracking.

Fruiter can not only help users to collect information to increase knowledge, but also enrich our lives.
